## WE

Amarya Technologies is a US based company, founded by a group of experts; pioneers in the field of Enterprise Applications. With a division in India, it has set out to create a niche in building composite applications in addition to the standard ones.

In the new era, sustained growth with high quality services is the one and only way for every enterprise to succeed. At Amarya, we help enterprises achieve growth while maintaining best in class customer satisfaction.

'Partnering in Growth' is the philosophy that drives the team at Amarya. Satisfaction of our clients underpins the corporate philosophy of Amarya Technologies. As part of our focused entrepreneurship initiative, we

provide a unique platform to the entire community of business experts and technology evangelists to strengthen their skills from being a beginner to reach the expert level where they can self build and deploy composite applications. What makes us different and unique

is our focus on delivering flexible and innovative enterprise solutions that our clients can adopt and deploy rapidly to differentiate themselves in today's changing market conditions. We build on reliable trusted partnership and strongly believe in long term relationship cultivated through delivery of high-end business solutions and services.

We build on reliable trusted partnership and strongly believe in long term relationship cultivated through delivery of high-end business solutions and services.

## WHY AMARYA?

With strong grooming in regimes of quality, the team at Amarya has defined quality with rapid delivery of flexible and innovative solutions as the end result to satisfy the business needs of the client.

### ■ BENEFITS OF IMPLEMENTING ERP

#### 1. Improve financial management and corporate governance

- Gain deep visibility into the organization with financial and management accounting functionality combined with business analytics
- Increase profitability, improve financial control, and manage risks

#### 2. Optimize Productivity through IT

- Integrate and optimize business processes
- Eliminate high integration costs by defining the needs clearly
- Deploy other business applications incrementally to improve cash flow and reduce costly borrowing.

#### 3. Gain higher ROI faster

- Deploy the business solutions using rapid-implementation techniques and reduce the costs
- Leverage preset defaults and prepackaged versions available for specific industries

#### 4. Retain top performers

- Retain your top performers through clearly defined career and development plans
- Link employees' performance to compensation programs such as variable pay plans and long-term incentives

#### 5. Provide immediate access to enterprise information

- Give employees new ways to access the enterprise information required for their daily activities.
